

What is claimed is:

- 1 1. Apparatus for providing programming, comprising:
 - 2 a display device for displaying an image, said display device having a clip
 - 3 for attaching said display device to another object; and
 - 4 a main body for receiving the programming which is displayed on said
 - 5 display device, said main body having a surface so that said main body sits on
 - 6 said another object or a further object.
- 1 2. Apparatus for providing programming, comprising:
 - 2 a display device for displaying an image, said display device having a clip
 - 3 for attaching said display device to another object; and
 - 4 a main body for receiving the programming which is displayed on said
 - 5 display device, said main body having a hook for attaching to one of said another
 - 6 object or a further object.
- 1 3. Apparatus for providing programming according to claim 1 wherein
- 2 said clip which is useable for attaching said display device to said another object
- 3 is alternatively for sitting with said display device on said another object.
- 1 4. Apparatus for providing programming according to claim 1 wherein
- 2 said display device separates from said main body.
- 1 5. Apparatus for providing programming according to claim 1 further
- 2 comprising a speaker unit having a speaker, wherein said speaker unit includes a
- 3 hinge.
- 1 6. Apparatus for providing programming according to claim 1 further
- 2 comprising a speaker unit having a speaker, wherein said speaker unit includes a
- 3 hook for attaching said speaker unit to one of said further object, said another
- 4 object and an additional object.
- 1 7. Apparatus for providing programming according to claim 6, wherein
- 2 said speaker unit further includes a hinge.
- 1 8. Apparatus for providing programming according to claim 2 wherein

2 said clip which is useable for attaching said display device to said another object
3 is alternatively for sitting with said display device on said another object.

1 9. Apparatus for providing programming according to claim 2 wherein
2 said display device separates from said main body.

1 10. Apparatus for providing programming according to claim 3 wherein
2 said display device separates from said main body.

1 11. Apparatus for providing programming according to claim 2 further
2 comprising a speaker unit having a speaker, wherein said speaker unit includes a
3 hinge.

12. Apparatus for providing programming according to claim 3 further
comprising a speaker unit having a speaker, wherein said speaker unit includes a
hinge.

13. Apparatus for providing programming according to claim 2 further
comprising a speaker unit having a speaker, wherein said speaker unit includes a
hook for attaching said speaker unit to one of said further object, said another
object and an additional object.

14. Apparatus for providing programming according to claim 3 further
comprising a speaker unit having a speaker, wherein said speaker unit includes a
hook for attaching said speaker unit to one of said further object, said another
object and an additional object.
